Conference
dedicated to the memory of academician
Andrei Aleksandrovich Gonchar

(1931–2012)

Moscow, November 25–26, 2013

The scope of this conference encompasses current topics in complex analysis and approximation theory and includes (but is not limited to) Padé approximations and their generalizations, orthogonal polynomials and potential theory. These are the principal fields of research, where the main interests of A. A. Gonchar were concentrated and where he obtained his main results.

Invited speakers:
A. Aptekarev (Keldysh Institute, RAS); L. Baratchart (INRIA, France);
A. Bogatyrev (Institute of Numerical Mathematics, RAS);
G. Lopez Lagomasino (Universidad Carlos III de Madrid);
A. Komlov (Steklov Institute, RAS); M. Melnikov (Universitat Autonoma de Barcelona);
M. Shcherbina (Verkin Institute, NAS Ukraine); M. Yattselev (Purdue University)
